

HeavyBid®

Estimating and Bidding Software

INNOVATIVE SOFTWARE
FOR THE CONSTRUCTION INDUSTRY

Estimate Faster

Reduce Risks & Mistakes

Win More Profitably

Estimating and Bidding Software

HeavyBid is the clear market-leader in construction with over 35,000 estimators using the software daily to bid everything from small projects costing \$20,000 to the largest, most complex multi-billion dollar joint ventures in North America.

With three different levels of software and the best trainers in the industry, we can help you build an estimating process that makes your company more competitive. **HeavyBid** also streamlines your operations by integrating directly with over 35 accounting systems, scheduling software like MS Project and Primavera P6, and other HCSS software used to run your company.

It all starts with the bid. Start it off right with **HeavyBid**.

- ✓ Be confident with our 24/7/365 *Instant* Support
- ✓ Enjoy our 12-month money back guarantee on software

Powerful, industry-leading construction estimating software

Rated 4.6/5 Stars on SoftwareAdvice.com

Estimate more work in less time

Quit reinventing the wheel on every estimate! Build your estimate faster with valuable time-saving features including direct import from DOT, copy from previous estimates, access to historical estimating and performance data, and integrated RSMeans assemblies. Create custom calculation routines and custom assemblies to build parts of your estimate automatically, and much, much more.

Manage bid day like a champ

Use HeavyBid to handle last minute changes from sub and supplier quotes, conduct self-perform vs. subcontractor analysis, and meet owners' minority requirements. Close the bid efficiently with flexible pricing calculations, then impress your clients with attractive and professional bid forms that are completely customizable.

Interface with other software

HeavyBid integrates worry-free with the other software vital to your business including:

- Primavera P3 & P6 & Microsoft Project
- Over 35 accounting systems
- Microsoft Excel, Outlook and Word
- Owner's bidding software like your state's DOT
- Other HCSS software like HeavyJob, The Dispatcher, BidHistory.com and FuelerPlus

Estimate the way you want

HeavyBid's flexible and robust capabilities enable you to handle virtually any bidding situation, from unit price or lump sum bidding, to design-build and joint venture projects. Organize your estimate based on what matters most to you (CSI, DOT, or custom WBS). Use flexible labor and equipment cost methods, cost types, mark-up capabilities, and unit prices to estimate the way you want.

Be confident using the industry standard for estimating

HeavyBid is used by over 35,000 estimators every day, from small contractors to 111 companies on the ENR Top 400 list. The software comes in three different levels with stand-alone, multi-user network or cloud-hosted options, and an iPad mobile app so as your company grows, HeavyBid will grow with you.

Reduce risks and minimize mistakes

No more broken formulas or spreadsheets to maintain. HeavyBid will automatically identify many potential estimating errors and give you a powerful suite of reports for review like the new Chief Estimator's Report. Easily mark items for review, see the net effect of cost changes, use the audit trail to track changes, and create custom key indicators to analyze your estimate against benchmarks.
